EXPERIENCE

Software Development Engineer

RapidQuest Solutions · Remote, India

Feb 2025 – May 2026

WhatsApp Marketing Shopify App

- Owned end-to-end merchant onboarding via Meta Cloud API - including WABA connection, template builder UI, automated template submission to Meta, and per-merchant webhook routing for dedicated WhatsApp delivery.
- Built 5+ automation pipelines (abandoned checkout recovery, cart reminders, order confirmation, COD confirmation, shipping updates) triggered by Shopify events and delivered via WhatsApp.
- Implemented bulk campaign and broadcast messaging to segmented user lists.
- Added team email alert system for Meta template submission results.
- App reached 1,000+ Shopify installs and 100+ paying merchants.

Email Marketing Shopify App

- Owned the complete email template builder: rebuilt the editor with drag-and-drop block reordering, click-to-edit fields, and reusable component blocks (headings, text, images, grids, sections, layout templates).
- Automated template preview generation using headless Chromium (Playwright), eliminating manual screenshot workflows entirely.

TECHNICAL SKILLS

Languages: JavaScript (ES2022+), TypeScript, Python

Frontend: React.js, Next.js, Tailwind CSS, ShadCN/UI, MUI, Chakra UI

Backend: Node.js, Express.js, REST API Design, Webhooks, Redis, Better Auth

Databases & ORM: PostgreSQL, MongoDB, Supabase, Prisma ORM

APIs & Integrations: Meta Cloud API, WhatsApp Business API, Shopify API, Razorpay, Gemini AI API, Resend

Tools & Platforms: Git, Vite, VS Code Extension API, TextMate Grammar, NPM, Figma, Playwright (Headless Chromium), Sentry, Cloudflare

Other: CLI Tooling (Commander.js), SaaS Billing Lifecycle, Idempotent Webhook Design

PROJECTS

FlowCMS — Headless CMS Platform

[Link](#) | [GitHub](#)

Next.js · TypeScript · Node.js · PostgreSQL · Prisma · Redis · Razorpay · Better Auth · Sentry · Cloudflare

- Built a full-stack SaaS headless CMS with structured content management, dynamic page publishing, media assets, multi-environment support, and public API delivery with API key authentication.
- Improved API key authentication performance replacing bcrypt with SHA-256 + Redis caching; implemented idempotent Razorpay webhook handling using Redis SETNX locks to prevent duplicate billing events.
- Designed invite-based waitlist onboarding with multi-stage flow (PENDING → JOINED), admin-controlled launch gating, and founder operations tooling for billing recovery, failed webhook visibility, and platform observability.

AI Auto Commit — VS Code AI Git Extension

[Marketplace](#) · [GitHub](#)

TypeScript · Gemini API · VS Code Extension API · simple-git

- Built a VS Code extension that reads staged Git diffs and generates semantically accurate commit messages using the Gemini API
- 135+ installs on the VS Code Marketplace.

Rune Lang — Custom Interpreted Language & VS Code Extension

[Link](#) | [GitHub](#)

Python · Lexer · Parser · AST · TypeScript · VS Code Extension API · TextMate Grammar

- Designed and built a minimal interpreted language from scratch: tokenizer, recursive descent parser, AST evaluator, and runtime with scope resolution, variable binding, and error handling.
- Published a VS Code extension with full syntax highlighting via custom TextMate (.tmLanguage) grammar
- 50+ installs on the VS Code Marketplace.

EDUCATION

Master of Computer Applications (MCA)

Poornima University, Jaipur, India

Aug 2022 – Apr 2024

Post Graduate Diploma in Computer Applications

Mewar University, Chittorgarh, India

Aug 2021 – May 2022
